An infant (from the Latin word *infans*, meaning "unable to speak" or "speechless") is the more formal or specialised synonym for "baby", the very young offspring of a human. The term may also be used to refer to juveniles of other organisms. A newborn is, in colloquial use, an infant who is only hours, days, or up to one month old. In medical contexts, newborn or neonate (from Latin, *neonatus* ...

When I was pregnant with my third child, I had a feeling that something was very different. The twenty week ultrasound confirmed my fears when our sweet baby was diagnosed with renal agenesis (Potter's Syndrome), and we were told that she would either be stillborn or live for only a very short time after birth.
