We've written before about how important it is to have a consistent bedtime for your baby or toddler. That, plus a good bedtime routine, is generally the first step in working towards sleeping through the night, and towards creating a predictable daily sleep and feeding schedule.. But what should that bedtime be, exactly? A bedtime that's too early may result in early-morning waking and ...

Baby talk is a type of speech associated with an older person speaking to a child. It is also called caretaker speech, infant-directed speech (IDS), child-directed speech (CDS) or motherese.. Baby talk has a "cooing" pattern of intonation different from that of normal adult speech: high in pitch, with many glissando variations that are more pronounced than those of normal speech.

What's making my child's skin so dry? Babies and children can get dry skin just like adults do. In fact, because young skin is more delicate, it's more susceptible to becoming dry. Cold, dry outdoor air and indoor heating can rob skin of its natural moisture in the winter. And if your child is prone ...
